

## On-Site Training Details

On-site training courses are two- to -three-days of in-person training, delivered at your facility. You can choose to follow the standard Kepware Product Training agenda, or work with Kepware trainers to customize your training course with additional modules.

### Typical Course Itinerary

- Detailed training on the KEPServerEX® connectivity platform architecture and how it connects to software applications and devices
- Live product demonstrations
- Exercises led by Applications Engineers
- In-depth discussions about IoT technology and Industrial Automation solutions
- An overview of OPC concepts
- Optimization of your unique server communications
- Walk-through of how to implement diagnostic tools for troubleshooting and debugging
- Examination of leading technology, such as REST for web connectivity and OPC UA for tunneling secure data

“You were very good at explaining and leading the class. Your knowledge and experience was apparent as you looked at our specific scenarios and helped to troubleshoot or find better solutions.”
