## KEPServerEX Connecting to a CODESYS Ethernet Device

January 2018  
Ref. 1.001

# Table of Contents

- 1. Introduction .....1
- 2. Supported CODESYS Devices .....1
  - 2.1 Tested CODESYS Devices and their Communication Parameters .....1
- 3. Supported CODESYS Devices and their Manufacturers .....2
  - 3.1 All Devices Running CODESYS Runtime and their Associated Manufacturers.....2
  - 3.2 All Products Running CODESYS Runtime by Company .....4

# 1. Introduction

CODESYS® develops a runtime engine that includes a protocol stack which can run on many different devices. PLC vendors can design and/or manufacture the hardware using CODESYS for the runtime engine and protocol stack. The hardware platform determines the configuration settings for connecting to a CODESYS device from Kepware's CODESYS Ethernet driver, therefore configuration settings can vary from one device to another.

Once the IP address and appropriate port are selected, all devices that support CODESYS 3.X should connect to KEPServerEX® with the default settings. Devices that support CODESYS 2.3 require additional communication settings.

## 2. Supported CODESYS Devices

The following table is a summary outline of devices tested by Kepware and their associated settings.

### 2.1 Tested CODESYS Devices and their Communication Parameters

			Communication Parameters						
		Model	IP Address	Port	Protocol	Layer 7 Motorola Byte Order	Device Motorola Byte Order	PLC Login	ELAU-Max4 Version
Tested Devices	Wago 750-8100	V3	Hostname or IP Address	11740	N/A	N/A	N/A	N/A	N/A
	Schneider PacDrive LMC Pro2	V3		11740	N/A	N/A	N/A	N/A	N/A
	Wago 750-842	V2.3		2455	Level 2	Enable	Enable	Disable	Disable
	ELAU PacDrive C200	V2.3		5000	Level 4	Disable	Disable	Disable	Disable
	ELAU PacDrive C400	V2.3		5000	Level 4	Disable	Disable	Disable	Disable
	ABB AC-500	V2.3		1201	Level 2	Enable	Enable	Disable	Disable
	Eaton XV-303	V2.3		1200	Level 2	Disable	Disable	Enable	Disable

### 3. Supported CODESYS Devices and their Manufacturers

The following tables list all of the supported CODESYS devices, based on data from [www.codesys.com](http://www.codesys.com) (updated November 2017).

#### 3.1 All Devices Running CODESYS Runtime and their Associated Manufacturers

Manufacturer	Device
3S-Smart Software Solutions GmbH	CODESYS Control RTE SL (for Beckhoff CX)
3S-Smart Software Solutions GmbH	CODESYS Control for BeagleBone SL
3S-Smart Software Solutions GmbH	CODESYS Control for Raspberry Pi SL
3S-Smart Software Solutions GmbH	CODESYS Control for IOT2000 SL
3S-Smart Software Solutions GmbH	CODESYS Control for PFC100 SL
3S-Smart Software Solutions GmbH	CODESYS Control RTE SL
3S-Smart Software Solutions GmbH	CODESYS Control for PFC200 SL
3S-Smart Software Solutions GmbH	CODESYS Control Win SL
3S-Smart Software Solutions GmbH	CODESYS Control for emPC-A/iMX6 SL
