

# 205

people attended Kepware's  
**KEPServerEX Version 5.16 Release Webinar.**

They were from different parts of the world...

...and had varying levels of experience configuring **KEPServerEX.**

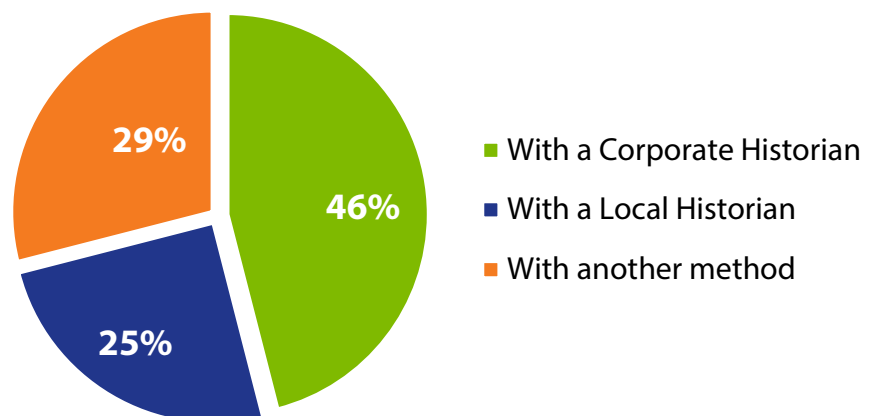

Lead by Applications Engineers **Joanne Bacharach** and **Ray Labbe**, the webinar focused on the following new products and enhancements included in **KEPServerEX version 5.16**:

- Local Historian Plug-In
- Industrial Data Forwarder (IDF) for Splunk Plug-In
- IEC 60870-5 Suite
- Application Report Utility

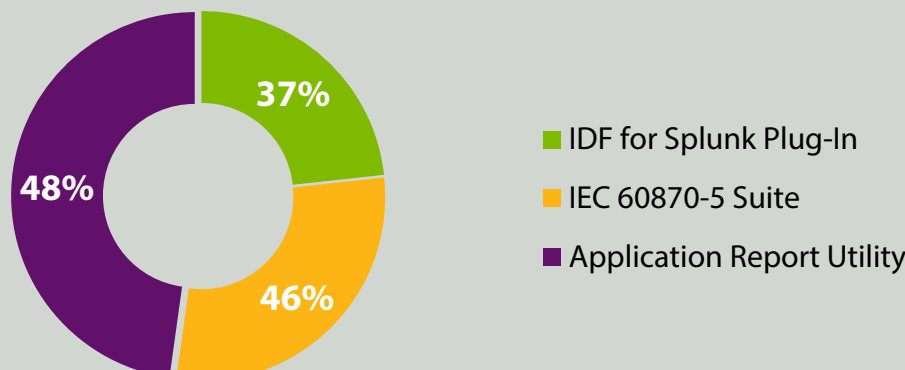

After a **digital tour**, attendees were asked about their current automation systems and future applications.

Many attendees are **already historizing data...**

...with **29%** reporting that they would like to use the new **Local Historian Plug-In for KEPServerEX** to move data collection, storage, and access closer to the data source.

Attendees also reported which of the other products or enhancements included in **KEPServerEX version 5.16** that they would like to use.
